

# Bristol G

The Bristol-G leather is an in-stock automotive leather program using the G-grain pattern. Bristol-G is the ultimate mark of automotive luxury and is perfect for the most discriminating automotive owner. Even though Bristol-G is a soft supple leather it is specified to have the best durability on the market. Bristol-G has been matched to many of the stocking vinyl programs on the market. Hides average 50 sq ft. Perfect for automotive aftermarket, furniture and aircraft applications.

# Avington

Avington was created to service the contract furniture market. Avington is a true full grain German leather and is dyed for color. After dying the Avington hides receive a water-based topcoat is added for protection. Hides average 55 sq ft. Avington has a fabulous color line that is perfect for automotive aftermarket, furniture and aircraft applications.

# Calico

Calico has a soft and supple hand yet great for family rooms and high traffic areas. Dyed for color consistency these hides also receive a topcoat for durability. Hides average 45 square feet. Perfect for automotive aftermarket, furniture and aircraft applications.

# Crocodile

Options Crocodile is a top-grain protected aniline leather that has been dyed for color and embossed to simulate a crocodile. These hides are then hand finished to create an aged appeal to this Crocodile grain. The Crocodile is tipped with a dark brown and then a clear coat is added for protection. Expect color variation from swatch to furniture due to the hand wiping process used to create the Crocodile pattern. Hides average 50 sq ft. Perfect for automotive aftermarket, furniture and aircraft applications.
